INDEX TO VOLUME 40

ARTICLES

- Academic Preferences and Their Apparent Relation to Student Change in a Program of General Education—With Particular Reference to Students in the Various Science Areas, A Study of, Victor Howard, 316-321.
- Actual Training of Beginning Science Teachers in the State of Illinois, What Administrators Want in the Training of Science Teachers and the, T. A. Nelson, 24-43.
- Adjustment and Maladjustment, An Experimental Study Applying Non-Aristotelian Principles in the Measurement of, Thomas M. Weiss, 312-316.
- Analysis of the Process by Which a Group Selects or Rejects Ideas or Beliefs, An, Chester A. Lawson, 245-253.
- Assumptions in Ninth-Grade General Science, The Role of, Ellsworth S. Obourn, 87-91.
- Biology Interests of Tenth and Eleventh Grade Pupils With a Topical Analysis of High School Biology Textbooks, A Comparison of the, Sam S. Blanc, 127-132.
- Books in an Active Program of Science, Clark Hubler, 211-212.
- Changes in NARST Positions, 332.
- Changes in Teaching from the Use of Research in Science Education, Nathan S. Washton, 383-387.
- Characteristics of Superior Science Students and Their Own Sub-Groups, Robert Douglas MacCurdy, 3-24.
- Children and Science, Gerald S. Craig, 167-179.
- Child's Science Interests, The School and the, Katherine E. Hill, 203-206.
- Concept Formation, The Effect of Different Learning Methods On, Finley Carpenter, 282-285.
- Conclusions of the Conference, N. Eldred Bingham, 216-217.
- Conference on Scientific Manpower, 357.
- Conservation and Resource Use Education, Robert M. Ring, 215-216.
- Critical Thinking and Research, Gordon M. Dunning, 83-86.
- Deductive Systems and the Integration of Natural Science Courses, Chester A. Lawson, 253-259.
- Developing a Program of Active Investigation, Elizabeth Cunningham, 213-214.
- Don't Discard Those 3 D Glasses, Harry Milgrom, 183-187.
- Elementary Science Education in Florida Schools, Trends in, Julian Greenlee, 224-228.
- Elementary Science in New York City, Harry Milgrom, 182-183.
- Elementary School Science—Some Problems, Peter C. Gega, 237-240.
- Elementary Science, What Can Administrators, Supervisors, Specialists, and Other Leaders Do to Aid in Developing a Program of Active Investigation in, Mamie Spangler, 214-215.
- Ellis Clyde Persing, Clarence M. Pruitt, 362-363.
- Essay Testing in Biological Science as a Means for Supplementary Training in Writing Skills, Walter S. Lundahl and John M. Mason, 261-267.
- Explorations in the Sciences—A Preliminary Report, Abraham Raskin, 120-123.
- Financial Report of NARST April 19, 1955, Clarence M. Pruitt, 160.
- Fourth Annual Review of Research in Science Teaching, Clarence H. Boeck, Jacqueline Buck Mallinson, Clark Hubler, William B. Reiner, and Edward K. Weaver, 337-357.
- General Education College Chemistry Course, The Development of a, Luther A. Arnold, 123-127.
- General Education Science Program at Western Michigan State College, The, W. C. Van Deventer, Haym Kruglak, and W. J. Berry, 98-102.
- Gerald Spellman Craig, Clarence M. Pruitt, 180-182.
- Identification and Evaluation of Principles of Soil and Water Conservation for Inclusion in the Secondary School Curriculum, The, Harley F. Glidden, 54-78.
- Industry and Education in Science Teaching, Methods of Cooperation Between, Harvey R. Russell, 220-224.
- Information Sources Children Use, Lahron H. Schenke, 232-237.
- Jeff West, Clarence M. Pruitt, 192.
- Learning Approach, Educational Significance of Studies on the Relation Between Rigidity and Problem Solving. III The, Finley Carpenter, 296-311.
- Lecture Versus Problem-Solving in Teaching Elementary Soil Science, Murray D. Lawson, 395-404.
- Meetings of the Association for the Education of Teachers in Science, 217-219.
- NARST—AAAS Program, New York City, 336.
- National Foundation for Infantile Paralysis Grants Assist Professional Education, 358.
- Official Minutes of the Business Meeting of the National Association for Research in Science Teaching, Teachers College, Columbia University, Clarence M. Pruitt, 160-162.
- Per Cent of Students Taking Each Basic Course, Omitting Each Basic Course, and Accelerating in Each Basic Course Associated with Eight Curriculum Areas at Michigan State University, E. R. Van Der Jagt and D. M. Mesner, 322-327.
- "Personality Approach," Educational Significance of Studies on the Relation Between Rigidity and Problem Solving. II Educational Implications from Studies Based on, Finley Carpenter, 286-296.
- Physical Science and the Elementary Teacher, Sam Adams and L. M. Harrison, 240-241.

- Physical Science Designed for General Education, The Organization, Installation, Implementation and Administration of a Course in, Cleveland James Franks, 114-119.
- Physical Science, The Problem Approach in, Clement L. Henshaw, 103-113.
- Points to Remember in Making an Exhibit, C. W. Mattison, 194-195.
- Predictability of Success in College Courses by Accelerating and Non-Accelerating Student as Measured by Scores Made by Entering Freshmen on A.C.E. and Cooperative Reading Test, E. R. Van Der Jagt and D. M. Mesner, 327-331.
- Problem Solving Objective, An Analysis and Check List on the, Ellsworth A. Obourn, 338-393.
- Program National Council for Elementary Science, 193-194.
- Program of Science, How Do Children Respond to an Active, Beatrice M. Moore, 215.
- Program of the National Association for Research in Science Teaching, 145-149.
- Progress Report on the Development of the General Science Curriculum Program in the Public Schools of New York City, Alfred D. Beck, 134-136.
- Report of the Future Scientists of America Foundation of the National Science Teachers Association, The, Nathan S. Washton, 150-152.
- Report to the NARST on the Relationships with the American Association for the Advancement of Science for the Year 1954-55, A, George Greisen Mallinson, 152-159.
- Research in Elementary Science During the Past Five Years, What Have Been the Major Emphases in, Jacqueline Buck Mallinson, 206-208.
- Research in Science Education, Symposium: Needed, Thomas P. Fraser, Herbert A. Smith, Jacqueline Buck Mallinson, Clarence H. Boeck, and Herman Branson, 363-377.
- Research, The "Golden Rule" in, Kenneth E. Lake, 377-378.
- Samuel Ralph Powers, Clarence M. Pruitt, 359-361.
- Science Clubs in the Making, Gilbert Benowitz, 228-232.
- Science in New York City Vocational High School, Nathan Clark, 132-134.
- Science in the 19th Century Normal School, Louis I. Kuslan, 138-144.
- Science Learnings Be Incorporated Into the Elementary School Curriculum, How Can, Paul E. Blackwood, 210-211.
- Science Learning Materials Be Selected on the Elementary Level, On What Basis Should, Harry Milgrom, 187-191.
- Science Talent, How Can the Elementary Science Program Reveal, Nourish, and Maintain, N. Eldred Bingham, 208-210.
- Science Teaching, A Look Ahead in, Kenneth E. Anderson, 379-381.
- Science Teaching: A Reply to Kenneth E. Anderson, A Look Backward in, George Greisen Mallinson, 381-383.
- Scientific Understandings, The Relative Efficiency of Reading and Demonstration Methods of Instruction in Developing, Clarence H. Boeck, 92-97.
- Socio-Biological Science Course in College General Education, A Brief for a, John N. Moore, 268-282.
- Sound Motion Pictures in High School Biology, Toward a More Effective Use of, Kenneth E. Anderson, Fred S. Montgomery, Herbert A. Smith, and Dorothy Smith Anderson, 43-54.
- Spontaneity and Coherence in Elementary Science Experiences, R. Will Burnett, 195-203.
- Subject-Matter Competency of Science Teachers, What Should be the, Nathan S. Washton, Paul Brandwein, Brenda Lansdown, William Goins, Jr., Abraham Raskin, and Harold S. Spielman, 392-395.
- Summary of Remarks to NARST Meeting in New York City on April 18, 1955, Saul Geffner, 137.
- William Carl Van Deventer, Clarence M. Pruitt, 82.
- William Lewis Eikenberry, Clarence M. Pruitt, 259-262.
